

Protecting people, property and assets across the UK

Specialist security services combining
manpower, technology and rapid response.

marpol.co.uk

A COMPLETE APPROACH TO SECURITY.

Established in 1992, Marpol delivers bespoke security solutions to both residential and commercial clients.

Providing a high standard of security services, we work with businesses of all sizes, from local operators to multinational organisations. Every solution is tailored to meet the specific needs of each client.

Our management team brings experience in the financial and legal sectors, as well as backgrounds in the police and armed forces. This ensures a professional, knowledgeable approach backed by real-world expertise.

Marpol creates integrated security solutions tailored to your site, your risks, and your requirements. Our services can be combined into a single, coordinated package that is regularly reviewed to maintain effective protection.

MANNED POWER – GUARDING & K9 UNITS

Having fully trained and experienced security personnel on site provides a strong and visible deterrent to theft, vandalism and unauthorised access. Our teams operate around the clock, delivering a consistent security presence tailored to your site.

MOBILE PATROLS & RAPID RESPONSE

Marpol's mobile patrol teams provide a visible security presence backed by a fast, professional response when incidents occur.

Patrols are carried out at scheduled or random intervals, helping to deter unauthorised access while maintaining consistent oversight of your site.

If an issue is identified or an alarm is triggered, our response teams attend promptly to assess the situation, secure the premises and take appropriate action.

This includes checking for signs of intrusion or damage, securing access points and liaising with emergency services where required.

K9 UNITS

Marpol's K9 units provide a powerful on-site deterrent, combining highly trained dogs with experienced handlers to protect high-risk and large-scale environments.

Their enhanced detection capabilities allow them to identify, track and challenge intruders more effectively, particularly across wide or low-visibility areas.

K9 units are deployed to support perimeter security, vacant properties and construction sites, delivering a visible and proactive security presence.

MONITORING

Security does not always require a physical presence on site. With advanced CCTV systems and a 24/7 Control Room, Marpol provides continuous monitoring supported by a professional response when it matters.

CCTV SYSTEMS

Marpol provides high-performance CCTV systems and CCTV towers designed to deliver clear, reliable coverage across your site.

Our systems utilise HD cameras with night vision, wide-area coverage and secure cloud-based access, allowing footage to be viewed remotely at any time.

Rapid-deployment CCTV towers provide flexible protection for vacant properties, construction sites and high-risk locations where immediate security is required.

Installations are tailored to your site layout, ensuring key access points, perimeters and high-risk areas are fully covered. Systems can also integrate with existing infrastructure where required.

All CCTV systems are connected to our 24/7 Control Room, enabling real-time monitoring and immediate response to any suspicious activity.

ALARM RESPONSE

When an alarm is triggered, Marpol's 24/7 Control Room is alerted immediately, allowing trained operators to assess the situation in real time and coordinate a professional response.

Our teams are deployed quickly to attend the site, investigate the cause of the activation and secure the premises where required. This includes checking for forced entry, signs of damage or unauthorised access, and ensuring the site is left safe and secure.

This removes the need for your staff to attend potentially high-risk situations and ensures every incident is handled by experienced security professionals.

REMOTE SECURITY SYSTEMS

Flexible, rapid-deployment security systems provide protection for sites that require immediate coverage or temporary solutions. Connected to our Control Room, these systems allow us to monitor, detect and respond to activity in real time.

TEMPORARY CAMERA SYSTEMS

Marpol's temporary camera systems provide rapid-deployment surveillance for sites requiring immediate protection.

Using HD cameras with night vision and wide-area coverage, they deliver clear visibility across key areas in all conditions. Footage is transmitted securely to our 24/7 Control Room, where activity is monitored in real time.

Fully integrated with our response teams, these systems enable threats to be identified and addressed quickly.

TEMPORARY ALARM SYSTEMS

Marpol's temporary alarm systems provide immediate protection for vacant or vulnerable properties, with no reliance on mains power.

These wireless, battery-powered systems detect unauthorised access at key entry points and high-risk areas. Alerts are sent directly to our 24/7 Control Room for real-time assessment.

Every activation is assessed by our Control Room and acted on quickly by our response teams.

SECURITY

Security is not limited to out-of-hours protection. A professional on-site presence helps maintain control, manage access and create a safer environment for staff and visitors.

CONCIERGE SECURITY

Our concierge security personnel provide a professional front-of-house presence while maintaining control over access to your site.

They manage entry points, monitor visitor activity and ensure only authorised individuals are permitted on site. This creates a controlled, secure environment while maintaining a positive first impression of your business.

With trained security professionals in place, risks are reduced, and day-to-day operations remain protected.

SECURITY CONSULTANCY & RISK ASSESSMENTS

Understanding your risks is the first step to effective protection.

Marpol provides detailed security risk assessment reports free of charge, identifying vulnerabilities and recommending practical solutions tailored to your site and operations.

Our assessments consider site layout, access points and existing security measures, ensuring nothing is overlooked.

- Site-specific risk analysis
- Clear, actionable recommendations
- Compliance and insurance support
- Ongoing review and support

PROPERTY PROTECTION

Vacant and vulnerable properties require active protection to prevent damage, trespass and costly delays.

VACANT PROPERTIES

Vacant properties are more vulnerable to intrusion, damage and ongoing deterioration without the right protection in place.

Marpol secures unoccupied buildings using a combination of physical security measures, monitoring systems and on-site support, helping to prevent unauthorised access, vandalism and costly disruption.

Our approach ensures properties remain protected, compliant and under control throughout vacancy periods.

VACANT PROPERTY MANAGEMENT

Effective protection requires ongoing management, not just initial security measures.

Marpol delivers a fully managed service that includes regular inspections, condition reporting and compliance support, ensuring risks are identified early and addressed quickly.

We monitor for signs of intrusion, damage, leaks or deterioration, while maintaining accurate records to support insurance requirements and legal compliance.

Additional services such as clearance, utility isolation and security adjustments can be delivered as part of a tailored management plan, keeping your property secure and ready for its next stage.

COMPLETE SECURITY ACROSS THE UK

Secure your site with a trusted, professional security partner.

Marpol provides rapid response, 24/7 monitoring and tailored security solutions designed to protect your property and reduce risk.
