

Internal and External Protection,
Fully Managed.

marpol.co.uk

TEMPORARY ALARM SYSTEMS

When a property becomes vacant or vulnerable, the risks increase immediately. Unauthorised access, vandalism, theft and fire are all concerns that cannot wait.

Marpol Security provides fully managed temporary alarm systems that can be deployed within hours, protecting sites with no existing power or cabling infrastructure. Our systems combine advanced outdoor detection with internal intruder protection, backed by 24/7 monitoring and rapid response.

Your site. Your choice.

Some sites need external protection at the perimeter. Some need internal protection inside the building. Some need both. Marpol Threat Detection and Marpol Intruder Detection can be deployed individually or together, giving you the right level of protection for your specific situation.

BUILT FOR HIGH-RISK ENVIRONMENTS

Our temporary systems are regularly deployed at:

- Vacant residential and commercial properties
- Construction and refurbishment sites
- Sites following eviction, break-in or emergency
- Buildings awaiting sale, lease or redevelopment
- Vehicle and equipment compounds
- Remote facilities and utilities

MARPOL THREAT DETECTION

External Perimeter Protection Designed to detect and deter intruders at your boundary before they reach your building.

External Perimeter Protection

Marpol HD Detection is Marpol's premium outdoor system, designed to detect and deter intruders at the boundary before they reach your building.

Key features:

- 🌙 Full HD day and night imaging
- 👁️ AI detection to reduce false alarms
- 📶 Up to 35m detection range
- 💧 IP67-rated for all outdoor conditions
- 🕒 Up to 400 days battery life
- 📶 Wireless with 4G/3G/2G connectivity
- ⚙️ Mesh network for simple scalable installation
- 📸 Captures images of intruders instantly

Internal Building Protection Designed to protect the inside of your building, with or without external detection in place.

Internal Building Protection

Marpol Intruder Detection is a wireless internal alarm system that protects the inside of a building once the perimeter has been breached.

Key features:

-  Indoor PIR motion detection
-  Smoke detection for fire risk monitoring
-  Audible siren deterrent
-  Central control panel
-  Remote arm and disarm
-  Battery-powered, no mains required
-  RF wireless communication
-  Up to 64 peripheral devices

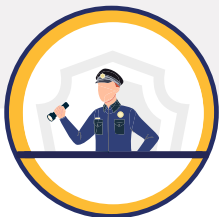

Rapid deployment, Immediate Protection.

Both systems are designed to go live fast. No power. No cabling. No contractors.

- Wireless installation with no cabling required
- No mains electricity needed at the property
- Single or multi-site deployment from one control point
- Protection in place within hours of instruction

INSTALL. MONITOR. RESPOND.

A detection system is only as effective as the response behind it. From the moment your system goes live, every alert is handled by Marpol's 24/7 Control Room, where trained operators assess activity in real time and act without delay.

1. INSTALL

Systems are configured and deployed to your site. Our systems are set up, tested and connected to the control room before the engineer leaves.

2. MONITOR

All alerts are received by Marpol's 24/7 Control Room. Operators review real-time imagery from both external cameras and internal detection, verifying threats before taking action. AI-assisted filtering reduces false alarms, so attention stays focused on genuine incidents.

3. RESPOND

Verified threats are met with an immediate professional response. SIA-licensed officers are dispatched, warnings are issued where appropriate, and emergency services are contacted when required. Every incident is documented with a full report.

FULL END-TO-END SERVICE

Marpol provides the complete package, from initial risk assessment and system installation, through to 24/7 monitoring and boots-on-the-ground response.

You deal with one company, and you get one fully accountable service.

What happens when an alarm activates?

Detection: Sensors & cameras capture activity and transmit images instantly

Verification: Control room operators assess the alert in real time using live imagery

Response: Officers are deployed & emergency services contacted if required

Secure and Report: The site is secured and a full incident report is provided.

ONGOING SUPPORT AND SYSTEM MANAGEMENT

Protection does not stop once the system is installed. Marpol provides continuous monitoring, remote system management and technical support throughout the entire duration your site is at risk.

- Continuous monitoring & system oversight
- Remote configuration, arming & disarming
- Adjustments as site risks change over time
- Technical support when required
- Detailed reporting for compliance and insurance purposes

PART OF A COMPLETE SECURITY SOLUTION

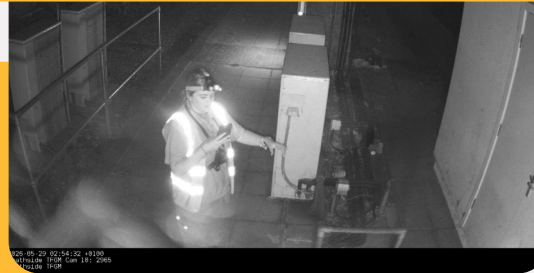

Temporary alarm systems integrate with Marpol's broader range of security services to deliver a fully layered site protection strategy.

Physical Security

- Steel security doors and window screens
- Boarding up services
- Concrete barriers and perimeter fencing

Manned Services

- Mobile patrols and rapid response
- Vacant property inspections
- Keyholding services

COMPLETE INTRUDER DETECTION ACROSS THE UK
