

Marpol Mobile CCTV Tower

Easily transportable, fully power independent, 24/7/365 visual security with rapid installation and minimal maintenance - ideal for large site coverage

Product overview

The Marpol CCTV Tower is the perfect standalone solution where remote CCTV security and monitoring are required. Easily transportable and set-up in minutes, it can be positioned in the most inaccessible locations yet give 24/7/365 visual security with minimal maintenance.

This rapid deployment telescopic tower is designed to run on solar power, boasts near-360-degree coverage and provides a highly visible deterrent. With a connection to multiple remote sensors placed around sites of almost any size, they will detect movement and instruct the mast-mounted camera to rotate, zoom, focus and live-record the event.

Key benefits

- ✓ Solar capability, no requirement for mains power
- ✓ Large site coverage with a single CCTV tower
- ✓ HD PTZ camera
- ✓ In-built capacity for night illumination and infrared vision
- ✓ Communication and monitoring
- ✓ Arm / disarm features
- ✓ Fully weatherproof
- ✓ Independent function
- ✓ Rapid setup

Applications

- Large open spaces
- Open car parks
- Construction sites
- Sports grounds
- Agricultural locations
- Storage yards
- Housing developments
- Warehousing
- Utility sites
- Vacant properties

PRODUCT BRIEF
Marpol CCTV Tower

Features & benefits

- **Large site coverage** with a single CCTV tower, connect up to eight remote, wireless PIR sensors, mounted up to 100m from the tower, each with ~30m detection range.
- **HD PTZ camera**, upon detection, each PIR will instruct the tower's camera to rotate, zoom and focus on the cause of the activation
- **In-built capacity for night illumination and infrared vision** to provide a visual deterrent and capture footage 24 hours a day. Capture clear images in any conditions, with footage shared with security teams or authorities as required.
- **Communication and monitoring** via mobile network so there is no requirement for mains power or fixed internet connection.
- **Fully weatherproof:** designed to withstand prolonged external exposure and adverse weather conditions. Vandal-proof keyboard.
- **Independent function:** designed to be left unmanned for long periods of time and, once installed, do their job with very little maintenance required. Towers are powered by solar energy and high-capacity batteries requiring minimum maintenance.
- **Swift setup:** Installation takes just 20 minutes to complete, and being fully live and monitored within a couple of hours.
- **Arm / disarm features** enable customisation and control on the go, plus monitoring from a remote location. Remote access & control via a bespoke mobile app.

RAPID DEPLOYMENT

The Marpol team can deploy Marpol CCTV Tower quickly in urgent situations and with **only 20 minutes installation time**, we can have your CCTV up and running in no time.

Whether short-term interim measures to defend premises or assets following a break-in, or a permanent installation to mitigate an ongoing safety threat.

OPTIONAL EXTRAS

Environmental Monitoring

The inViro Air Quality Monitoring System is the latest in smart environmental technology. It comes with both battery and solar-powered options; eliminating the need for any hardwire installation and making it quick and easy to deploy.

- Data is easily collected, analysed and shared
- Accurately monitors and senses multiple pollutants - particulates and gases
- Suitable for outdoor and indoor use
- Temperature stability - tested in both sub-zero and sub-Saharan African temperatures
- MCERTS accredited

Analytics and Artificial Intelligence

Artificial Intelligence technology allows for accurate detection and differentiation of humans, vehicles and animals in a wide range of situations, using day or night vision.

Video analytics process live video in real-time and transform it into intelligent data that is used to detect and track objects in the video stream. This information forms the basis on which to perform certain actions, such as:

- Line monitoring/incursion detection
- Loitering behaviour monitoring
- Traffic monitoring flow
- Stopped vehicle detection
- Noise change detection
- Accurate alarm filtering
